MUZAMIL
Front-end Developer

ABOUT ME

I am an aspiring front-end developer with a strong foundation in HTML, CSS, JavaScript, and React.js. Eager to learn and grow, I have built projects like a Pizza delivery app and an e-commerce clone to enhance my practical skills. I am passionate about creating responsive and user-friendly web applications and am seeking opportunities to contribute to innovative teams while continuing to develop my expertise.

HANDS-ON EXPERIENCE

Daraz Landing Page Clone

- Developed a highly accurate fully responsive single page web page clone using Tailwind and React-js. The page features a responsive design, smooth animations, and a visually appealing layout.

Worldwise Application for choosing TODO List

- Developed a WorldWise app using React, enabling users to set their todo City list by clicking on the map and select it for thier trip . A world map that tracks your footsteps into every city you can think of. Never forget your wonderful experiences, and show your friends how you have wandered the world.

Omni Food project in HTML/CSS

- Developed an interactive website for a food delivery company using HTML, CSS, and JavaScript. The website features a responsive design, smooth animations, and a visually appealing layout.

OMDb Movie Search and Watchlist App

- A React.js app to search for movies using the OMDb API and add them to a personalized watchlist. Discover, organize, and track your favorite movies effortlessly!
